HOMES FOR HAITI

HELP INVEST IN HAITI'S FUTURE.

WHO WE ARE

EMCC Global Initiatives

EMCC has a history of partnering with nationals in Global Relief & Development work

EMCC - Global Initiatives is partnering with VANCOR to build houses to respond to the intermediate needs of post earthquake Haiti.

VANCOR

50 years experience in all facets of construction

Over 12 years experience installing insulated panels in small and large scale applications in North America

Looking to use construction experience to assist Haitians in need

OUR OBJECTIVE

To provide long-term shelter to any internally displaced people.

PROJECT PROPOSAL: PHASE I

Build 1,000 homes in rural Haiti

Train Haitian nationals for assembly

Manufacture homes in Canada and ship to Haiti.

2 TYPES OF HOMES

MULTIGENERATIONAL HOUSE

Contains 3 bedrooms and a great room

Houses are 441 sq ft = 41 sq m

Steel doors and screened, sliding windows

Potential for Solar power and water harvesting

SINGLE FAMILY UNIT

Made up of 3 rooms in a 15'4" x 15'4" area

Designed to meet the needs of those living in the tent cities

These units will be constructed as a 4-plex including concrete floors, shower stalls and water collection

PHASE II

Establish a manufacturing plant in Haiti to produce panels

Supply Haiti with a safe housing option on a long term basis

Create jobs for Haitians in the following areas:

- Manufacturing
- Transportation
- Construction
- Management

**A RAPID BUT
LONG-TERM
HOUSING
SOLUTION.**
